

Assignment- Flask Registration Form

Problem Statement:

Create a Flask web application that handles a user registration form.

The application should:

- Create a Flask app
 - Display a registration form using HTML templates
 - Take user input (name, city, phone number)
 - Handle form submission using Flask routes
 - Display submitted data on a confirmation page
-

Expected Output:

Running the application should:

- Show a registration form in browser
 - Accept user input
 - Submit form data to server
 - Display confirmation page with entered details
-

Submission Guidelines:

- Create **ONE main folder**.
- Example folder name:
FlaskForm-YourName
- Inside this folder include:
 - Python source file (.py)
- Convert the folder into **ZIP format**.
- Upload the ZIP folder on the submission portal.
